

Sunrise Institute of Technology

Course Handbook — Academic Year 2026-27

This handbook is a sample document created for the purpose of a student RAG (Retrieval Augmented Generation) project. It describes fictional policies for a fictional institute named Sunrise Institute of Technology. Any resemblance to a real institution's actual policy is coincidental. It is intended only for testing document search and question answering.

1. Introduction

Welcome to Sunrise Institute of Technology. This handbook explains the academic rules, assignment procedures, attendance requirements, grading policy, and examination structure that apply to all undergraduate students enrolled in the Computer Engineering programme. Students are expected to read this handbook carefully at the start of every semester, since rules may be revised from year to year by the Academic Council.

The handbook is organised into sections covering assignments, attendance, grading, examinations, and general conduct. Each section states the policy in plain language along with the office or portal responsible for it, so that students know exactly where to go for help.

2. Assignment Submission

All assignments must be submitted through the official Learning Portal available at learn.sunrise.edu. Submissions made by email, in person, or through any other channel will not be accepted or graded under any circumstance.

Every assignment carries a fixed due date and time shown on the Learning Portal dashboard. Students should upload work at least a few hours before the deadline to avoid last-minute server load issues. The portal automatically time-stamps every submission, and this time stamp is treated as final for grading purposes.

Group assignments require only one member of the group to upload the final file, but all group member names and roll numbers must be listed on the first page of the submission. Individual assignments must be uploaded separately by each student.

3. Attendance Policy

A minimum of 75 percent attendance is required in each course to be eligible to sit for the end-semester examination. Attendance is calculated separately for lecture sessions and laboratory sessions.

Students who fall below 75 percent attendance due to a medical emergency may apply for condonation through the Dean of Academics office, along with a medical certificate. Condonation may reduce the requirement to a minimum of 65 percent, but this is granted only in genuine emergency cases and is not automatic.

Attendance for a class is marked within the first ten minutes of the session. Students arriving after this window will be marked absent for that session even if they are present for the remainder of the class.

4. Grading Scheme

Each course is evaluated using a combination of continuous assessment and a final examination. The distribution of marks is shown in the table below.

Component	Weight
Assignments	20%
Mid-Semester Test	20%
Laboratory / Practical Work	20%
End-Semester Examination	40%

A student must score at least 40 percent in the End-Semester Examination component independently, in addition to an overall aggregate of 40 percent across all components, in order to pass a course.

Grade letters are assigned on a ten-point scale ranging from O (Outstanding, 90-100 marks) down to F (Fail, below 40 marks). The exact grade boundaries are published on the institute website at the start of every academic year and may vary slightly between departments.

5. Examination Pattern

The Mid-Semester Test is conducted for a duration of 90 minutes and covers the first half of the syllabus for that course. The End-Semester Examination is conducted for a duration of 3 hours and covers the entire syllabus, with slightly greater weight given to topics taught in the second half of the semester.

Students must carry their institute identity card to every examination. Entry without a valid identity card is not permitted, and students who forget their card must obtain a temporary pass from the Examination Cell at least one day in advance.

6. Re-evaluation and Grievances

Students who wish to have their End-Semester Examination answer sheet re-evaluated may apply through the Learning Portal within seven days of result declaration. A re-evaluation fee applies and is refunded only if the grade changes as a result of re-evaluation.

Any grievance regarding continuous assessment marks, such as assignments or the mid-semester test, should first be raised directly with the concerned faculty member. If the issue remains unresolved, the student may escalate it in writing to the Head of Department.

7. Faculty Contact and Office Hours

Each faculty member publishes weekly office hours on the department notice board and on the Learning Portal. Students are encouraged to use office hours for doubts related to coursework rather than approaching faculty immediately before an examination.

For general academic queries that are not course-specific, students may contact the Academic Office at academics@sunrise.edu. Queries related to the Learning Portal itself, such as login issues, should be directed to the IT Helpdesk.

8. Late Submission

The Learning Portal does not accept uploads after the displayed deadline. Students who miss a deadline due to a genuine technical failure on the portal side, verified through IT Helpdesk logs, may request a short extension from the concerned faculty member on a case-by-case basis.

9. Scholarships and Financial Assistance

The institute offers a Merit Scholarship to the top 5 percent of students in each department based on the previous semester's aggregate grade. The scholarship covers 25 percent of that semester's tuition fee and is credited directly to the student's fee account before the next semester begins.

A separate Need-Based Financial Assistance scheme is available for students from economically weaker backgrounds. Applications are submitted through the Accounts Office along with supporting income documents, and are reviewed by a committee that meets twice a year, once before each semester.

Students receiving any scholarship must maintain a minimum attendance of 75 percent and a minimum aggregate grade point, as described elsewhere in this handbook, failing which the scholarship may be withdrawn for the following semester.

10. Semester Registration

Every student must complete semester registration through the Learning Portal within the first week of each semester. Registration involves confirming the list of courses for that semester and paying the applicable semester fee.

Students who fail one or more courses in a previous semester may need to re-register for those specific courses alongside their current semester load, subject to timetable availability. The Academic Office publishes a list of backlog course slots at the start of every semester.

Late registration, after the first week, is permitted only with the written approval of the Head of Department and attracts a late registration fee.

11. Internships and Industry Projects

Third-year and final-year students are encouraged to undertake a summer internship with an industry partner. Internships arranged through the institute's Training and Placement Cell may be counted toward the mandatory internship credit requirement, provided the internship duration is at least six weeks and a completion certificate is submitted.

Students who arrange an internship independently, outside the Training and Placement Cell, must obtain prior approval from their department to ensure the internship qualifies for academic credit.

A short internship report and a presentation before a faculty panel are required within two weeks of the start of the following semester in order for the internship credit to be finalised.

12. Revision History

This handbook is reviewed annually by the Academic Council. Minor clarifications may be issued during the year as circulars, which are posted on the Learning Portal notice board and take precedence over the printed handbook until the next annual revision is published.
